CODING

APPLICATION TEST

(JavaScript/PHP/Rust)

This simple coding test will give us a good overview of your technical and personal skills and may seem really easy, but take your time and think of the output before you start.

The code should be written in one of the following programming languages:

- JavaScript
- PHP
- Rust

TASK

Develop a program that counts from 0 to 100 and prints out `Hello` for all numbers divisible by 3 and prints out `World` for all numbers divisible by 5.

NOTE: There can only be one valid output value per line.

HINT

The program should be as flexible as possible and reflect your skills.

NOTE: Frameworks are allowed.

SEND IN

Create a public Github repository with `README.md` which describes your approach and how to use it, commit your code and send us a link to this repository.
